

## Wash Basin in Fossil Stone

This harmonious circular form, perfectly shaped out of this unique stone, is a statement in itself.

This artisanal item, combines function with beauty. The wash basin is perfectly sized ensuring it is fit for purpose and a joy to wash in. The water gently flows down the carefully hand polished interior curves finding its way seamlessly through the plug hole.

Washbasins / wash basins, basins, or sinks have been used since time immemorial to wash ones face and hands. They can be freestanding, under and over mounted. These are often the most prominent fixture in a bathroom, usually sitting pretty on or within a vanity top fashioned out of [marble](#), granite or stone. Why not sit this 'object of desire' over a semi-precious vanity top ?

De Ferranti also makes Vanity tops from semi-precious stones.

**Product Specifications:**
